- ▶ I'll be gate keeper, provide overview and discuss the 1997
- ▶ Paula Baker and Elizabeth Cooksey will discuss information in the Children and YA

# Overview of Session

- ▶ Professor Bellair had a death in his family. We will attempt to pinch hit.
- ▶ I'll be gate keeper, provide overview and discuss the 1997
- ▶ Paula Baker and Elizabeth Cooksey will discuss information in the Children and YA
- ▶ Professor Bruce Weinberg (OSU, Economics) will discuss an application using the NLSY79

# Overview of Session

- ▶ Professor Bellair had a death in his family. We will attempt to pinch hit.
- ▶ I'll be gate keeper, provide overview and discuss the 1997
- ▶ Paula Baker and Elizabeth Cooksey will discuss information in the Children and YA
- ▶ Professor Bruce Weinberg (OSU, Economics) will discuss an application using the NLSY79
- ▶ Frank Marino volunteered to field all the hard questions.

# Helpful Hints

Becoming old-hands at this NLS stuff; but something you have not heard yet—

# Helpful Hints

Becoming old-hands at this NLS stuff; but something you have not heard yet—

- ▶ Read the Users Guide.

# Helpful Hints

Becoming old-hands at this NLS stuff; but something you have not heard yet—

- ▶ Read the Users Guide.
- ▶ Will need to work with the questionnaire, especially for 1997.

# NLSY 1979, Children and Young Adults

# NLSY 1979, Children and Young Adults

The NLSY 1979 asked questions on delinquency and contact with police in 1980.

# NLSY 1979, Children and Young Adults

The NLSY 1979 asked questions on delinquency and contact with police in 1980.

The Children of the NLSY79 asked R age 10 and older about participation in various illegal activities, 1988–2002.

# NLSY 1979, Children and Young Adults

The NLSY 1979 asked questions on delinquency and contact with police in 1980.

The Children of the NLSY79 asked R age 10 and older about participation in various illegal activities, 1988–2002.

Paula and Elizabeth will provide more details in a minute.

# NLSY79 Crime Questions

- ▶ Delinquency - activities in last year (20 items)

# NLSY79 Crime Questions

- ▶ Delinquency - activities in last year (20 items)
- ▶ Income from illegal activities within last year

# NLSY79 Crime Questions

- ▶ Delinquency - activities in last year (20 items)
- ▶ Income from illegal activities within last year
- ▶ Number of times stopped by police

# NLSY79 Crime Questions

- ▶ Delinquency - activities in last year (20 items)
- ▶ Income from illegal activities within last year
- ▶ Number of times stopped by police
- ▶ Number of times booked or arrested

# NLSY79 Crime Questions

- ▶ Delinquency - activities in last year (20 items)
- ▶ Income from illegal activities within last year
- ▶ Number of times stopped by police
- ▶ Number of times booked or arrested
- ▶ Number of times incarcerated, date of release

## Indirect information

- ▶ Know location of interview - follow R into Jail/prison.

## Indirect information

- ▶ Know location of interview - follow R into Jail/prison.
- ▶ No questions in the questionnaire as why they are in prison.

## Indirect information

- ▶ Know location of interview - follow R into Jail/prison.
- ▶ No questions in the questionnaire as why they are in prison.
- ▶ At minimum, from geocode data NLS knows type of facility (jail, state or federal prison).

# Design Challenge

# Design Challenge

Useful to list some of the challenges in designing a survey to capture criminal activity.

# Design Challenge

Useful to list some of the challenges in designing a survey to capture criminal activity.

- ▶ Complicated dynamic process—individual activity, contact with police, contact with judicial system. Takes time to work through system. And multiple outcomes along each path.

# Design Challenge

Useful to list some of the challenges in designing a survey to capture criminal activity.

- ▶ Complicated dynamic process—individual activity, contact with police, contact with judicial system. Takes time to work through system. And multiple outcomes along each path.
- ▶ Relatively rare activity — time consuming to probe on activities.

# Design Challenge

Useful to list some of the challenges in designing a survey to capture criminal activity.

- ▶ Complicated dynamic process—individual activity, contact with police, contact with judicial system. Takes time to work through system. And multiple outcomes along each path.
- ▶ Relatively rare activity — time consuming to probe on activities.
- ▶ Anti-social behavior. Social editing may occur.

- ▶ Anti-social behavior. Social editing may occur.
- ▶ Consequently: Questions appear in **Self Administered Questionnaire**

# Design Challenge

# Design Challenge

Indeed, criminal activity and process within judicial system among the most complicated processes to recover because R may be simultaneously in different stages of the process for different criminal activities.

# Design Challenge

Indeed, criminal activity and process within judicial system among the most complicated processes to recover because R may be simultaneously in different stages of the process for different criminal activities.

For example, may be awaiting trial on crime while in jail for another.

## Design Challenge

Indeed, criminal activity and process within judicial system among the most complicated processes to recover because R may be simultaneously in different stages of the process for different criminal activities.

For example, may be awaiting trial on crime while in jail for another.

And, judicial system's time line does not typically coincide with the survey's. Likely to cross survey rounds.

# Compromises

# Compromises

NLSY97 attempted to capture R's criminal activity **and** sequence through the judicial system subject to the time and budget constraints.

# Compromises

NLSY97 attempted to capture R's criminal activity **and** sequence through the judicial system subject to the time and budget constraints.

Commit criminal activity

# Compromises

NLSY97 attempted to capture R's criminal activity **and** sequence through the judicial system subject to the time and budget constraints.

Commit criminal activity

Have contact with police (Stopped or arrested)

# Compromises

NLSY97 attempted to capture R's criminal activity **and** sequence through the judicial system subject to the time and budget constraints.

Commit criminal activity

Have contact with police (Stopped or arrested)

Go to trial?

# Compromises

Commit criminal activity

Have contact with police (Stopped or arrested)

Go to trial?

Convicted?

Sentenced? If so, type and duration.

# Cross Round

The biggest challenge is following the process across rounds.

# Cross Round

The biggest challenge is following the process across rounds.

Do not obtain a complete event history of criminal activities — for all crimes tracking the consequences through the entire judicial process.

# Cross Round

The biggest challenge is following the process across rounds.

Do not obtain a complete event history of criminal activities — for all crimes tracking the consequences through the entire judicial process.

NLSY97 collects substantial longitudinal information just not a complete enumeration.

# Contents of 1997–Delinquency

# Contents of 1997–Delinquency

**Delinquent** activities defined as behavior unlawful for minors but not necessarily for adults.

# Contents of 1997–Delinquency

**Delinquent** activities defined as behavior unlawful for minors but not necessarily for adults.

## Contents of 1997–Delinquency

**Delinquent** activities defined as behavior unlawful for minors but not necessarily for adults.

- ▶ Run away from home (stay overnight)

# Contents of 1997–Delinquency

**Delinquent** activities defined as behavior unlawful for minors but not necessarily for adults.

- ▶ Run away from home (stay overnight)
- ▶ Carry a gun

# Contents of 1997–Delinquency

**Delinquent** activities defined as behavior unlawful for minors but not necessarily for adults.

- ▶ Run away from home (stay overnight)
- ▶ Carry a gun
- ▶ Gang Activity

# Contents of 1997 – Crime

## Contents of 1997 – Crime

**Criminal** activities defined as behavior unlawful for adults.  
(Though may be a minor when commit offense.)

## Contents of 1997 – Crime

**Criminal** activities defined as behavior unlawful for adults.  
(Though may be a minor when commit offense.)

Collects information on **participation** and **intensity** in (previous year/since date of last interview).

## Contents of 1997 – Crime

**Criminal** activities defined as behavior unlawful for adults.  
(Though may be a minor when commit offense.)

Collects information on **participation** and **intensity** in (previous year/since date of last interview).

Types of criminal activities include:

# Arrest

# Arrest

Round 1 — Retrospective information from age 12. Round 2 and beyond — activities since date of last interview.

# Arrest

Round 1 — Retrospective information from age 12. Round 2 and beyond — activities since date of last interview.

Collect information on age at first arrest, most recent arrest.

# Arrest

Round 1 — Retrospective information from age 12. Round 2 and beyond — activities since date of last interview.

Collect information on age at first arrest, most recent arrest.

Rounds 2–4 activities only **sdli** no attempt to follow-up on arrests (charged/convicted/sentenced).

Round 5 (and beyond) follow-up on arrests from previous rounds to determine their final outcome.

# Arrest Loop

Series of questions to determine **date of arrest**, **whether charged**, and if charged **type of offense** (may have multiple charges), whether **convicted** or pled guilty, and if convicted the **sentence** where served and duration.

# Arrest Loop

Series of questions to determine **date of arrest**, **whether charged**, and if charged **type of offense** (may have multiple charges), whether **convicted** or pled guilty, and if convicted the **sentence** where served and duration.

Refer to the **Users Guide** for exact information on the application of the arrest loop.
